Coronavirus Disinfection in Histopathology

Histology is a science dealing with the structure of cells and their formation into tissues and organs. Histotechnology centers on the detection of tissue abnormalities and the treatment for the diseases causing the abnormalities. Tasks performed by a histotechnologist include grossing & fixation, processing, embedding, sectioning, and staining.

Laboratory Methods In Histotechnology

I thought this was some kind of study guide for histotechnology, but all it really is a reprint of the AFIP (Armed Forces Institute of Pathology) Laboratory Methods in Histotechnology (1992). This means that it is just a photocopy of the original text. While the drawings are okay, all photos are in black and white and are faded and washed out.
