This guide to routinely performed laboratory procedures is essential for any veterinary practitioner or nurse learning to perform, or already performing, routine urinalysis and hematology laboratory procedures. It includes the basic information of how to collect, preserve, prepare, and examine specimens.

About Laboratory Hematology  
Urine analysis is commonly called urinalysis. You provide a urine specimen to your doctor, who in turn sends it to a lab to be analyzed. The most routine type of urinalysis involves a dipstick test in which an indicator stick is dipped into the urine. Multiple tests are performed using a single indicator stick.

Blood Drug Testing | LabCorp  
Urinalysis (Urine Test) A doctor may simply perform a urine dipstick test in the office. Only a few minutes are needed to obtain results. Your health-care provider may also send a urine sample to the lab for culture testing (see below). These results take a few days to come back.

Laboratory Urinalysis and Hematology for the Small Animal ...  
Blood in the urine, also called hematuria, is not a normal finding, but it is not uncommon. Although blood in the urine can be worrisome for the person who experiences it, it is not necessarily a cause for alarm. Hematuria is a sign, not a disease itself. It is an indicator that prompts a healthcare practitioner to investigate further to try to ...
