Lady Bug: Angular Kinematics - PhET Contribution

Ladybug Revolution activity: Exploring rotational motion (Inquiry Based) Description This is an inquiry lab that follows the PhET activity guidelines. Learning Goals: Students will be able to explain some of the variables for rotational motion by describing the motion of a bug on a turning platform; describe how the bug's position on the ...

Join the ladybug in an exploration of rotational motion. Rotate the merry-go-round to change its angle, or choose a constant angular velocity or angular acceleration. Explore how circular motion relates to the bug's x,y position, velocity, and acceleration using vectors or graphs.

Ladybug Revolution - PhET

Ladybug Revolution Lab 10/30 5. After several trials of revolving the ladybug using different angular velocities and radii, it can be determined that $Velocity = radius \times angular\ velocity$.

Ladybug Revolution activity: Exploring rotational ... - PhET

This document directs them to PhET where they will be using the ladybug revolution simulation. The activity sheet is also meant to direct the students in their learning so that they are confident in what material needs to be understood and they include their work and answers right on that sheet.

Ladybug Revolution Lab 10/30 - APPhysicsZM

Ladybug Revolution Virtual Lab 10/24/2012. Part One: 5. Play around with the simulation to see if you can determine if anything else affects the velocity and how. Determine a mathematical relationship for velocity: The Velocity is affected by both ω (angular velocity) and r (radius). As ω or r increase, the velocity increases, and as they decrease, the velocity decreases. $v = \omega \cdot r$, The ...

This is an interactive simulation on the topic of uniform and nonuniform circular motion. It features a ladybug rotating on a rotating platform. Users can change the location of the ladybug, add a bug of larger mass, change the various initial kinematics quantities, display vectors and graphs of the kinematics quantities.

PhET Simulation: Ladybug Revolution

To: Ladybug Labs Hi Mike, I wanted to write in and tell you about our wonderful experience with our lab, Zoey, that we adopted from you in 2016. Zoey has been a wonderful addition to our family and continues to be a great family member and future service dog for Stephanie. It was difficult to train her not to bite, but as the new lab owners, we ...

Ladybug Motion 2D Vector controls for circle/elliptical motion (inquiry based) Description Learning Goals: Students will be able to draw motion vectors (position, velocity, or acceleration) for an object is moving while turning. This is an inquiry based opportunity for students to draw and interpret motion vectors for circular and elliptical ...

Lady Bug Simulation Lab

This lab is designed to help students grasp an understanding of basic rotational kinematics such as angular displacement, angular velocity, and angular acceleration. After developing those ideas, students will try to determine two rotational kinematic equations and compare them to their linear counterparts. Subject Physics: Level
