some step in the proof went wrong, that is, that there is a sentence in the proof that is not a tautological consequence of the premises. Suppose there is such a sentence, call it Q . Q is derived from some prior sentences by one of our inference rules. So now we have a proof by cases. In each case

answer key ...

We adopt a formal language for making statements, since natural languages (like English, for example) are far too vague and ambiguous for us to analyze sufficiently. Armed with the formal language, we will be able to model the notions of truth, proof and consequence, among others. While

Acces PDF Language Proof Logic Answer Key

logic is technical in nature, the key concepts in the course will be developed by considering natural English statements, and we will focus the relationships between such statements and their FOL counterparts.
