Multiple Choice Questions and Answers on Signal and Systems

The above theorem states that a discrete inverse Fourier transform of X 0 (ω) yields a T-

replication of x 0 (t). We will discuss a dual version of Theorem 5.7 in the next section on time-domain sampling. The Fourier transform pair, e i m ω 0 t ⇔ 2 π δ (ω − m ω 0), and (5.1-115) imply that x (t) has the

Fourier transform,
