Large mammal survey Large mammals were surveyed during the dry and minor wet seasons from 15 March to 7April and from 11 September to 2 October 2011, respectively, using the line-transect method and interviews with local people. Animals were recorded using direct observation (actual sighting) of species, identification

Mammals - Zv7ri vol.2
The large flying fox (Pteropus vampyrus) is generally reported as the largest bat. Its wingspan has been verified to 1.83 m (6.0 ft) and may possibly reach 2 m (6.6 ft). In weight it is surpassed by the closely related Indian flying fox (P. giganteus), which is the heaviest bat at up to 1.6 kg (3.5 lb). A few other relatively poorly known species of flying foxes may match these, but few ...
