Author: Thomas L Carroll, MD; Chief Editor: Arlen D Meyers, MD, MBA more... Indirect mirror laryngoscopy is the traditional modality used to perform laryngeal examinations on dysphonic patients.The rod lens telescope, introduced by Hopkins, has several advantages over the traditional indirect laryngoscope.

Dynamic Voice Evaluation Using Flexible Endoscopy ...

Indirect laryngoscopy is performed whenever the provider visualizes the patient's vocal cords by a means other than obtaining a direct line of sight (e.g. a mirror). For the purpose of intubation, this is facilitated by fiberoptic bronchoscopes, video laryngoscopes, fiberoptic stylets and mirror or prism optically-enhanced laryngoscopes.

Laryngeal Evaluation - am-medicine.com

Also called: fiberoptic laryngoscopy, fiberoptic flexible endoscopy, nasopharyngoscopy, transnasal laryngoscopy. Laryngeal stroboscopy: This examination is a specialized viewing of vocal fold vibration. Laryngeal stroboscopy involves controlled high-speed flashes of light timed to the frequency of the patient's voice.

Direct and Indirect Laryngoscopy: Equipment and ...

Indirect laryngoscopy uses a small mirror held at the back of your throat. The health care provider shines a light on the mirror to view the throat area. This is a simple procedure. Most of the time, it can be done in the provider's office while you are awake. A medicine to numb the back of your throat may be used.

Laryngoscopy and nasolaryngoscopy: MedlinePlus Medical ...

Laryngeal carcinoma is the most common head and neck cancer worldwide . Indirect and fiberoptic laryngoscopy has the main role in the evaluation of laryngeal lesions specially the glottic and supraglottic lesions, yet there are certain areas that are not optimally examined making the evaluation less accurate and incomplete .

Laryngoscopy - Wikipedia

Utah Subscriber Answer: The laryngeal mirror, or indirect laryngoscopy, is considered an integral part of an otolaryngologic examination and should never be billed if an evaluation and management service is also performed, says Susan Callaway, CPC, CCS-P, an independent coding and reimbursement specialist and educator in North Augusta, S.C. Therefore, code 31505 (laryngoscopy, indirect; diagnostic [separate procedure]) can be billed only if it is the sole service provided to the patient ...

Laryngoscopy/Stroboscopy - THE VOICE FOUNDATION

Results. The level of evidence that supports routine preoperative laryngoscopy is weak. The risk of harboring preoperative VCP in the absence of previous neck or other risk-related surgery, advanced malignancy or voice symptoms is very low (0.5% of cases).

Is there a case for selective, rather than routine ...

Indirect laryngoscopy is an office procedure that is commonly used by otolaryngologist-head and neck surgeons and speech pathologists to evaluate the structure and function of the larynx and the pharynx. Although it was originally developed and named for the purpose of laryngeal evaluation, it should now be recognized that the complete indirect flexible laryngoscopy procedure should include the evaluation of palatal, tongue-base, and lateral pharyngeal wall structure and function as well ...
