signal reading. remove sensor clean off rust on block and refit sensor. should now start but will require fault codes reset at your ldv garage

LDV V80 Panel Van – Official site for LDV in the UK

Quite difficult access but got it changed. Turns out the old sensor was working fine (good hot/cold readings on bench test). My starting problem was air in the fuel filter, primed the system and it started fine. Think I have a tiny air leak somewhere. Engine management light is now on so I'll have to get a code reader & find out what's up.
