UCC28810 - Embedded Processing | Semiconductor Company

DALLAS, Nov. 30, 2017 /PRNewswire/ -- Texas Instruments (TI) (NASDAQ: TXN) today introduced the first 3-channel high-side linear automotive light-emitting diode (LED) controller without internal MOSFETs which gives designers greater flexibility for their lighting designs. The TPS92830-Q1's novel architecture enables higher power and better thermal dissipation than conventional LED ...

LED Lighting Controllers RS Components

Linear LED controller ICs for dimmable LED applications are a perfect fit for LED applications such as light engines, modules, and strips by combining a small form factor with a low cost. Through its higher integration, BOM savings and protecting long lifetime of LEDs, these LED controller ICs have many advantages over discrete, and in various cases, DC-DC buck IC solutions.
