SSelected Answerselected Answers Go online for Step-by ...

Possible answer: The Substitution Property states that if $a = b$, then b can be substituted for a in any expression. Applying the Symmetric Property to the Substitution Property shows that if $b = a$, then a can be substituted for b in any expression. So if $a = b$ and $b = c$, then $a = c$ by the Substitution Property, and this is also the Transitive Property.
