To spend more time studying transformations, you can check out the corresponding lesson titled Basic Rigid Transformations: Reflections, Rotations & Translations.

Lesson 8-1: Transformations

This lesson introduces students to the concept of rigid transformations. Students will have prior-learned language to describe these movements, like "flip," "turn," or "slide." Allow students to use these descriptions to enable them to talk freely about what they see; however, be sure to introduce the formal names of these movements so students can begin to internalize them.
