The Biology Project: Cell Biology  
Get unlimited access to over 84,000 lessons. Try it now ... All living cells contain a cell membrane. The cell membrane is the semi-permeable structure that surrounds the cell.

The Hallmarks of Cancer: Cell  
Kinder Tech Lessons - Recommendations, Qtr. 1: There may be more material here that can be covered in the time allotted. If that is the case, prioritize the skills and activities most important for your students' needs.

What Does the Cell Membrane Do in a Plant Cell? - Video ...  
Students learn about the types of waves and how they change direction, as well as basic wave properties such as wavelength, frequency, amplitude and speed. During the presentation of lecture information on wave characteristics and properties, students take notes using a handout. Then they label wave parts on a worksheet diagram and draw their own waves with specified properties (crest, trough ...

The wacky history of cell theory - Lauren Royal-Woods | TED-Ed  
Prokaryotes, Eukaryotes, & Viruses Learn about the cells that make up all living systems, their organelles, and the differences between living cells and viruses. The Cytoskeleton Learn that the cytoskeleton acts both a muscle and a skeleton, and is responsible for cell movement, cytokinesis, and the organization of the organelles within the cell.

Waves and Wave Properties - Lesson - TeachEngineering  
After a quarter century of rapid advances, cancer research has generated a rich and complex body of knowledge, revealing cancer to be a disease involving dynamic changes in the genome. The foundation has been set in the discovery of mutations that produce oncogenes with dominant gain of function and tumor suppressor genes with recessive loss of function; both classes of cancer genes have been ...
