Investopedia

Underwriting is the process of evaluating the risk of insuring a home, car, driver or individual in the case of life insurance or health insurance, to determine if it's profitable for the insurance company to take the chance on providing insurance. After determining "risk", the underwriter sets a price and establishes the insurance premium that will be charged in exchange for taking on that risk.

How Does the Life Insurance Underwriting Process Work?
What Is Life Insurance Underwriting.
In essence, life insurance underwriting is the method through which insurers evaluate the risk a potential buyer poses in order to decide whether or not to approve, deny, or rate up a life insurance policy. As a rule of thumb, the healthier a person is, the less risk he/she poses, and the lower rates he/she will get.
