In Exploring Public Speaking, especially in its second through fourth editions, we have attempted to create a usable, zero-cost textbook for basic public speaking courses or courses that include basic public speaking skills as one of their primary learning outcomes. The free, open nature of the text means that instructors are able to use all or part of it, and add their own materials.

Linear Algebra 4th Edition Stephen  
Linear algebra is the branch of mathematics concerning linear equations such as:  $ax + b = c$ , linear maps such as:  $(x, y, z) \mapsto (ax + by + cz, \dots)$ , and their representations in vector spaces and through matrices.. Linear algebra is central to almost all areas of mathematics. For instance, linear algebra is fundamental in modern presentations of geometry, including for defining basic objects such as lines, planes ...
