Integrating ideas of Peirce, Bühler, Bakhtin, Piaget and Jakobson, this book defines three linguistic supertypes each operating with either the situation in reality, the speaker's experience of it or his condensed information to the hearer. It offers an understanding of language and its role in perception, cognition and communication.

### (PDF) Review of: Per Durst-Andersen. Linguistic Supertypes ...

In programming language theory, subtyping (also subtype polymorphism or inclusion polymorphism) is a form of type polymorphism in which a subtype is a datatype that is related to another datatype (the supertype) by some notion of substitutability, meaning that program elements, typically subroutines or functions, written to operate on elements of the supertype can also operate on elements of the subtype.

### Supertype | definition of Supertype by Medical dictionary

Each human language is a complex of knowledge and abilities enabling speakers of the language to communicate with each other, to express ideas, hypotheses, emotions, desires, and all the other things that need expressing. Linguistics is the study of these knowledge systems in all their aspects: how is such a knowledge system...
