[EPUB] Logic Systems N4 Study Guide

Logic investigates and classifies the structure of statements and arguments, both through the study of formal systems of inference and through the study of arguments in natural language. It deals only with propositions (declarative sentences, used to make an assertion, as opposed to questions, commands or sentences expressing wishes) that are capable of being true and false .

3 Logic Study Guide By contrast, \wedge and \vee are dyadic functors, combining two Propositions each. This means there are 4 possible combinations of T and F for the two Propositions, so there are four lines in their Truth Tables. The top line (where both p and q are True), and the bot-tom line (where both are False), are identical for \wedge and \vee .

A Logic Study Guide Structure of English, 2006

Logic - Logic - Logical systems: Logic is often studied by constructing what are commonly called logical systems. A logical system is essentially a way of mechanically listing all the logical truths of some part of logic by means of the application of recursive rules—i.e., rules that can be repeatedly applied to their own output. This is done by identifying by purely formal criteria certain ...
