Longitude - definition of longitude by The Free Dictionary

If on a globe of the Earth we connect all points with the same latitude, we get circles of different size. These are "lines of latitude" (drawing). The longest is the equator, whose latitude is zero, while at the poles, at latitudes 90° north and 90° south (or -90°), the circles shrink to a point.. Longitude On the globe, lines of constant longitude ("meridians") extend from pole to pole ...
