TRAINING SYSTEMS FOR AUTOMATION TECHNOLOGY
If you have a real smart card (as opposed to a memory card, but I can't derive that from "custom smartcard"), addressing its memory as a byte array is a very unusual work split between the host application (everything) and the smart card application (nearly nothing). It also makes things for the smart card more difficult, since checksums for files are a standard mechanism but if you have to ...

Why are smart cards better than other ID token technologies? Smart cards are widely acknowledged as one of the most secure and reliable forms of an electronic identification (ID) token. A smart card includes an embedded integrated circuit chip that can be either a microcontroller chip with internal memory or a secured memory chip alone.
