The Making of the English Landscape - Wikipedia

In Manufacturing Montreal Robert Lewis provides a detailed historical geographic account of a major North American city's industrial landscape from the beginnings of industrialization to the Great Depression. Challenging the traditional view that urban expansion due to industrial decentralization is a twentieth-century phenomenon, Lewis demonstrates that the process of industrial ...

The making of the industrial landscape | University of Derby

The Making of the English Landscape is a 1955 book by the English local historian William George Hoskins. It is illustrated with 82 monochrome plates, mostly photographs by Hoskins himself, and 17 maps or plans. It has appeared in at least 35 editions and reprints in English and other languages. The book is a landscape history of England and a seminal text in that discipline and in local history. The brief history of some one thousand years is widely used in local and environmental history courses
