3. Working With Ratios That Include Decimals. Question: Simplify 10:2.5. Explanation: To easily work with ratios, whole numbers are necessary. The easiest way to make this ratio include whole numbers is to multiply both sides by the same number – in this case, 2 makes sense. $10 \times 2 = 20$. $2.5 \times 2 = 5$. Our whole number ratio, therefore, will be ...
