Our core business is the development and distribution of electronic engine and machine monitoring systems. The first EMS2 started it all as just another installation product for 4x4 vehicles but the industry has grown to become a self-standing business with products found in many countries around the world.

NEW Version MAN CATS III Diagnostic Solution
If you already have a NMEA 2000 backbone you
will only need a cable of proper length and a
tee to attached the Engine Monitoring Device
to your backbone. Before ordering, it is
recommended that you check to make sure your
display device, whether a chartplotter,
navigation software or other, has the
capability to display the engine information.
