Managing Internetworks with SNMP Designing Wide Area Networks and Internetworks: A Practical Guide: A Practical Guide Routing in Today's Internetworks: The Routing Protocols of IP, DECnet, NetWare, and AppleTalk Managing Research, Development and Innovation: Managing the

Monitoring and Managing your Network with SNMP

The manager is software that receives the traps and that provides a mechanism to SET or GET SNMP objects from the network device. To receive autonomous traps, the manager runs an application that listens on the TCP/IP SNMP trap port (port 162). SNMP SETs and GETs use port 161. This application is typically called a Trapd, or trap daemon.

Troubleshooting SNMP; Analyzing MIBs PDF

This work shows how the Simple Network Management Protocol (SNMP) is used to monitor and manage the performance, reliability and security of individual networks. It explains the practical application of SNMP, how to manage and monitor far-reaching and global networks and the principles of SNMP.
