MapInfo Professional User Guide - Pitney Bowes
All you would have to do is change that name before starting MapInfo Pro. We have examples of how this can be done using a bat file that first changes the name of the license server and then launches MapInfo Pro. The context of the bat file could look like this for MapInfo Pro 17.0: Set _reg=HKCU\Software\MapInfo\MapInfo\Professional\1700
