### Timing Belt Replacement - Marks on Timing Belt

This is a list of automobile engines developed and sold by the Suzuki Motor Corporation. Suzuki is unusual in never having made a pushrod automobile engine, and in having depended on two-strokes for longer than most. Their first four-stroke engine was the SOHC F8A, which appeared in 1977. Suzuki continued to offer a two-stroke engine in an automotive application for a considerably longer time ...

### G1 Engine Timing - Buggies Gone Wild

Using a 75mm bore and 84.5mm stroke, Suzuki created the G15A which is found in some Japanese Cultus models from 1991. With a 9.5:1 compression ratio and a SOHC four-valve-per-cylinder head, the G15A is rated at 71kW at 6000 rpm and 128Nm at 3200 rpm. Reasonable nothing in comparison to the GTi engine.

### Timing Marks - The CJ2A Page Forums

Similar marks will usually be found on at least one of the camshaft pulleys. When the timing belt or chain is properly installed, the mark set to the block mark on the crankshaft will be identical to the mark set to the camshaft and head. The goal of setting timing is to have this lineup happen
