Master of Science in Mathematics (MSc) - University of British Columbia
The Master of Science in Bioinformatics is an interdisciplinary program that combines the application of computer technology to the management and analysis of biological data. The result is that computers are being used to organize data generated from experiments into databases, develop new algorithms and software, and use this software for the interpretation and analysis of the data into ...

Mathematical Models Biology Leah Edelstein
Mathematical and theoretical biology, or biomathematics, is a branch of biology which employs theoretical analysis, mathematical models and abstractions of the living organisms to investigate the principles that govern the structure, development and behavior of the systems, as opposed to experimental biology which deals with the conduction of experiments to prove and validate the scientific ...

List of New York University alumni - Wikipedia

Mathematical and theoretical biology - Wikipedia
Mathematicians use theoretical and computational methods to solve a wide range of problems from the most abstract to the very applied. UBC's mathematics graduate students work in many branches of pure and applied mathematics. The MSc program consists of 24 or 27 credits of taught classes and a thesis (6 credits) or essay (3 credits) supervised by a faculty member. Students enrolled in the ...
