In mathematical analysis, asymptotic analysis, also known as asymptotics, is a method of describing limiting behavior.. As an illustration, suppose that we are interested in the properties of a function  $f(n)$  as  $n$  becomes very large. If  $f(n) = n^2 + 3n$ , then as  $n$  becomes very large, the term  $3n$  becomes insignificant compared to  $n^2$ .The function  $f(n)$  is said to be "asymptotically equivalent to  $n^2$  ...
