The Motronic system is digital. It has adaptation memory of and malfunction lamp. In some vehicles, for not having distributor, the ignition timing control (spark) is commanded by Rotation Sensor, installed in the engine flywheel (static system).

Motronic ME7

Motronic is the trade name given to a range of digital engine control units developed by Robert Bosch GmbH (commonly known as Bosch). It provides combined control of fuel injection and ignition in a single unit. By controlling both major systems in a single unit, many aspects of the engine's characteristics (such as power, fuel efficiency, drivability, and emissions) can be improved.

Motronic Explained

The Motronic 1.8 engine management system was introduced with the 1992 Volvo 960. The primary difference between this Motronic system and the previous generation of Volvo LH-Jetronic engine management systems is the fact that ignition timing is controlled directly by the Motronic PCM. Earlier Volvo
