Comparison of economic valuation methods

Economic evaluation is defined as a comparative analysis of alternative courses of action in terms of both their costs and consequences. The authors make clear that the subject matter of economics is the deployment of real resources whether they cost money or not, for example, time, and that the economic notion of cost differs from the accounting notion of expenditure.

Economic Evaluation - an overview | ScienceDirect Topics

Economic evaluation is the process of systematic identification, measurement and valuation of the inputs and outcomes of two alternative activities, and the subsequent comparative analysis of these. The purpose of economic evaluation is to identify the best course of action, based on the evidence available. It is most commonly employed in the context of health economics and health technology assessment.
