project estimating requirements - GSA

The payoff for engaging in standards work is greater than many small business people realize. Standards are both important and interesting. For a company like Baltic Safety, it's essential to get involved with the working groups so we can get started early with our planning for future designs and production methods.

Compact disc - Wikipedia

The contract documents also establish the Scope of Work (SOW). The standard method is to review and understand the design package and take off (or perform a quantity survey of) the project scope by itemizing it into line items with measured quantities. RSMeans refers to this as, "Scope out the project," and, "Quantify."
