5 Best Network Simulators for Cisco Exams: CCNA, CCNP ...

Keep in mind I had already set Full Control to the machine Users account on the VirtualBox folder, so that may have had an impact, but the access rights alone did not allow me to run the installer. I could not disable my anti-virus (corporate system). Thanks for posting your fix, it led me to my solution ?

Microsoft System Center Virl Machine

VIRL requires more processing power and memory compared to other solutions. The minimum system requirements are 8GB of memory and four CPU cores allocated to the virtual machine. VIRL recommends 12GB of memory in order to use a full 20 IOS nodes. VIRL's resource calculator states that each IOSv node requires 512MB of memory and a third of a CPU ...
