Well luckily, such a migration can be considered a net-gain from the productivity of the world, Any migration of skilled labor is inevitably a loss to the country that invested into the training, but that country may be so dysfunctional that actually being productive is itself prohibitively expensive, covered in red-tape or even stigmatized (sort of like my last job)!

How migration is changing the world's cities

Exodus: How Migration is Changing Our World (titled Exodus: Immigration and Multiculturalism in the 21st Century for its UK release) is a 2013 book by the development economist Paul Collier about the way migration affects migrants as well as the countries that send and receive the migrants, and the implications this has for development economics and the quest to end poverty.

Exodus: How Migration Is Changing Our World - Wikipedia

Human migration involves the movement of people from one place to another with intentions of settling, permanently or temporarily, at a new location (geographic region). The movement often occurs over long distances and from one country to another, but internal migration (within a single country) is also possible; indeed, this is the dominant form of human migration globally.
