Unlike the 600 series of plastic
models, the SX-70 is a fully-fledged
mirror camera made of steel and
glass that features leather
elements. The camera comes with a
4-component 166mm f/8 lens with a
fixed focal distance. The shutter
speed can be set in the 1/175-10s
range. Focusing is completely
manual and gives you unlimited
creative possibilities.**

Hi people! I recently bought an a new spotmeter (Minolta spotmeter F). I'm working mostly on videos. I'm trying to understand how to calculate the difference between shutter speed and shutter angle. The problem is, whenever I'm shooting a video I have to set my shutter angle at 180 degrees, my spotmeter can achieve 1/30 to 1/60.
