Fuel consumption at idle | Chevrolet Cruze Forums

Compact cars that carry a 2-liter capacity engine burn around 0.16 – 0.3 gallons of gas on a per hourly basis. A large sedan, on the other hand, with a 4.6-liter engine, burns approximately 0.5 – 0.7 gallons of gas while idling. One should also keep in mind that the diesel engine's fuel consumption at idle is not much. This is because of ...

Mins Diesel Engine Fuel Consumption
Because the engine is not operating at its optimal temperature when idling, fuel is only partially combusted, leading to fuel residue buildup on the cylinder walls. This can further damage engine components, including spark plugs and exhaust systems, increasing maintenance costs and shortening the life of the engine. Idling and fuel consumption
