In mathematics, the logarithm is the inverse function to exponentiation. That means the logarithm of a given number x is the exponent to which another fixed number, the base b , must be raised, to produce that number x . In the simplest case, the logarithm counts the number of occurrences of the same factor in repeated multiplication; e.g. since $1000 = 10 \times 10 \times 10 = 10^3$, the "logarithm base 10 ...
