Living Roofs: Modern Green Roof Technology. While green roofs have been around since the dawn of civilization, the modern green roof (often referred to as a "living roof") has only been around since the late 70's. Historically, green roofs were earth covered structures consisting of sod roofs, hollowed out hills, or patio roof gardens.

Modern Green Roof / Living Roof Technology

Modern timber roofs are mostly framed with pairs of common rafters or prefabricated wooden trusses fastened together with truss connector plates. Timber framed and historic buildings may be framed with principal rafters or timber roof trusses. Roofs are also designated as warm or cold roof depending on how they are designed and built with regard to thermal building insulation and ventilation.
