In principle, I retired on 23 Oct. 2014, but in reality not a lot changed. I am still teaching, speaking around the world, and writing. But we did have a nice party. Some people in the Dept. asked a number of my current and former students, postdocs, and colleagues near and far to describe me in one word and also to give an extended description in 30 seconds. These video clips were assembled ...

Andrew S. Tanenbaum - Wikipedia
The first half of Modern Operating Systems focuses on traditional operating systems concepts: processes, deadlocks, memory management, I/O, and file systems. There is nothing groundbreaking in these early chapters, but all topics are well covered, each including sections on current research and a set of student problems.
