Molecular Quantum Mechanics (5th Edition) View more editions. The size ( $\Delta E$ ) of the quantum involved in an excitation is equal to the product of the Planck's constant ( $h$ ) and frequency ( $\nu$ ). Here, the value of  $\Delta E$  is  $1.64 \times 10^{-18}$  J. Compute the frequency in Hz, as follows: Substitute for  $h$ , and for  $\Delta E$  in the equation (1). Thus, the size of the
