ONT stands for Optical Network Terminal. The ONT (also called the modem) connects to the Termination Point (TP) with an optical fibre cable. It connects to your router via a LAN / ethernet cable and translates light signals from the fibre optic line from your TP into electronic signals that your router can read.

The Optical Network Terminal (ONT) converts the optical signal coming through the fiber into separate signals for TV, voice, and data. The ONT is installed with Fios service on either the outside or inside of your home (garage, basement, closet, etc). The Verizon Fios network must be able to communicate with your ONT at all times.
