had two features.**

Analyzing Longitudinal Data using Multilevel Modeling

**Multilevel and Longitudinal Modeling Using
Stata, Third Edition, by Sophia Rabe-Hesketh
and Anders Skrondal, looks specifically at
Stata's treatment of generalized linear mixed
models, also known as multilevel or hierarchical
models. These models are mixed because they
allow fixed and random effects, and they are
generalized because they are appropriate for
continuous Gaussian responses as ...**

One application of multilevel modeling (MLM) is the analysis of repeated measures data.

Multilevel modeling for repeated measures data is most often discussed in the context of modeling change over time (i.e. growth curve modeling for longitudinal designs); however, it may also be used for repeated measures data in which time is not a factor.
