Most significantly you've got to love them and you've got to have 'the present associated with teaching'.

Naming Ionic Compounds Practice Worksheet

An ionic compound is a combination of oppositely charged ions. Ionic compounds generally contain a metal bonded to a non-metal (or non-metals). When naming ionic compounds we simply name the cation (the positive ion) then the anion (the negative ion). The cations generally retain the name of the element, so Na^+ is named sodium.
