Aquatic Life. Manatees are usually seen alone, in pairs, or in small groups of a half dozen or fewer animals. From above the water's surface, the animal's nose and nostrils are often the only thing visible. Manatees never leave the water but, like all marine mammals, they must breathe air at the surface.

Manatees | National Geographic

Reaching up to 13 feet (4 meters) long and weighing as many as 1,300 pounds (600 kilograms), West Indian manatees look more like small cars than people. Despite their large size, manatees are graceful swimmers. Although they usually move along in slow motion, they can also cruise, or swim at a steady pace, at five miles (eight kilometers) an hour.
