BA and D Phil at Oxford researching the evolution of behaviour.

Nature Via Nurture: Genes, Experience, and What Makes Us ...

Matt Ridley reminds us that it was Francis Galton who began the nurture versus nature debate, in the 19th century. Galton, who was half cousin to Charles Darwin, also "invented" eugenics, the striving to improve the human race through "selective breeding." This debate—nurture versus nature—has more or less dominated the 20th century.

*"Nature via Nurture"; the title sounds like a
dead horse that doesn't need to be beaten any
more. I decided to pick this one up because I
love Ridley's work, and because it is read by
the author. What a treat that is! With the
author reading the book, you know that the
nuances are correct, and that the abridgement
isn't harming the message.*

Nature Via Nurture Genes Experience

Get Free Nature Via Nurture Genes Experience And What Makes Us Human

Nature via Nurture grapples with one of the perennial questions that face all students of the life sciences; namely, what controls our behavior: genes or the environment? In the second half of the twentieth century it became fashionable to claim that scientists no longer believed behavior was all genes (genetic determinism) or all environment (radical environmentalism).

Nature via Nurture: Genes, Experience and What Makes Us ...

The discovery of a gene, or genes, for g would settle the question. Nature via
