SunnyNeo - HTML Tutorial

The solution we have come up with is to only allow clean code! Only words inside of HTML and Stylesheets (CSS) that we know are safe and that meet proper coding standards can pass the new filters. It may sound a little overwhelming, but never fear, we have come up with some helpful tips to guide you along! Got a burning question?

Nutty's Simple HTML guide

User-created web pages use HTML and CSS, and TNT pages (owned by Neopets) use HTML, CSS, and JavaScript. Asked in Social Network Websites , Neopets How do you make Neopets layouts ?

The HTML Filter - Neopets

Neopets own html. Following a heap of enquires about how to do stuff with User Lookups and other shop, pet bits I have tracked down a help page here, or here thanks to chinesian878, or here thanks to starzprincess8. Basic webmaster tools

Lesson 2 - Adding Text - Neopets

Neopets is the reason I'm a software engineer. Along the way looking for "cheat codes" for Neopets, I discovered some people hacking the games. I eventually ran a forum on hacking Neopets, made money from ads, got into PC World Magazine, and had a great time along the way.

Neoboard Fonts | Jellyneo.net

Colour Chart Use the colour chart to find yourself a colour code. Simply click on the colour you want to get the colour code from. You can copy and paste the code from the colour chart to use it for your fonts etc. If you want to find out the exact colour code from a colour in your avatar, you can try SunnyNeo's Eyedropper Tool Tutorial.

CSSGuide got their homepage at Neopets.com

Lesson 2 - Inserting text. The majority of webpages are made up of text. If you have ever used a keyboard, you already know how to type text in HTML. To type something into your webpage, simply type what you want to appear on your page. You only need to use tags if you want the text to do something special. Some commonly used tags are:

Neopets Html Css Guide

The Neopets HTML Guide. Many people ask how to make cool shops like the ones in the Marketplace or how to make their Neopet's webpage look better. The answer is HTML. HTML is a language that is used to create webpages. It is very simple to learn and anyone can do it. You don't need to be a programmer or even to have really used a computer before.

The Neopets HTML Guide

HTML Tutorial About this guide This tutorial should teach you the basics of HTML, even if you have never done anything with HTML before! We've tried to explain everything as basic as possible so it is easy to understand.

Lesson 4 - Changing Colors - Neopets

Gallery Layouts. Altador Cup Gallery Layouts; Normal Gallery Layouts; How does it work? These are pre-made layouts to use in your gallery layout. Copy the coding in the box and then paste it into your Gallery Description.Shop and Gallery layouts are seperate now due to the strict blocks neo has put on codes in shop layouts.

Neopets HTML basics - Answers

Css Codes All codes work in any neo page (and also should work on none neo pages :P) and in all browsers, unless otherwise noted. To use these codes you will need to put the code between a set of style tags, the style tags look like:

SunnyNeo - CSS Codes

Lesson 4 - Font Colours. You can change the colour of your font very easily. For the most frequently used colours, you can use the name of the colour, e.g red, black, green, blue, gray, white. HTML uses American English spellings, so if you want to change the colour of something, you need to type "color."

Site Themes What are they? Site themes are what replaced the sidebar themes when neo decided to revamp their layout. Along with different options for header/footer, and floater images, when you change your site theme it also has changes to your font colors and other default areas, like the table headers in your lookup, to colors that match the theme you have set for your site theme.
