A molecular map of the brain's decision-making area

the neuroscience of moral decision making I'm a neuroscientist at the University of Oxford in the UK. I'm interested in decision making, specifically decisions that involve tradeoffs; for example, tradeoffs between my own self-interest and the interests of other people, or tradeoffs between my present desires and my future goals.

Behavioral and Cognitive Neuroscience Reviews: SAGE Journals

How does neuroscience impact decision making? Brain physiology limits the number of items we can usefully consider, so decision making seems likely to depend on individual biology. People also differ in how sensitive they are to negative outcomes, uncertainty, risk, and volatility, and these individual sensitivities strongly shape the way they ...
