When two rescuers are present, performing CPR on a child is the same as performing CPR on an adult, except that the compression ventilation ratio when 2 rescuers are present drops to 15:2. One or two hands may be used to compress the chest to a depth of  $\frac{1}{3}$  the diameter of the chest. We'll discuss using an AED on a child later on.

2015 New CPR Guidelines. The American Heart Association announced its newest CPR recommendations on October 16 th, 2015. The new CPR guidelines are based on the latest scientific data from the previous 5 years. The new update has placed limits on how fast and deep chest compressions should be performed. The guidelines are updated every five years.

A critical part of Basic Life

Support training is understanding and properly adhering to the BLS algorithms. These present the basic course of action that a rescuer should perform for life support.

### **Basic Life Support and Emergency CPR - ACLS**

The most recent BLS 2015 guidelines (ILCOR 2015) retain many of the 2010 recommendations, again reinforcing the chain of survival. However, there is an increased emphasis on simplification of compression method, good quality bystander CPR and encouragement thereof,
