be done in a doctor's office or clinic.

American Cancer Society's new cervical cancer screening ...

For women age 30 or older, both HPV/Pap cotesting and HPV testing alone are more sensitive than Pap testing alone. Therefore, a woman with a negative HPV test and normal Pap test—or just a negative HPV test—has a very low risk of developing precancerous cervical lesions over the next several years. It is for that reason that, when Pap and HPV cotesting or HPV testing alone are used, the ...
