Nintendo - Official Site - Video Game Consoles, Games  
The Nintendo DS is compatible with only a very specific type of wireless standard and encryption. Your router must support the 802.11b standard. This is an older standard, and some routers may have it disabled by default. The Nintendo DS can only connect using WEP encryption. This is an older, much less secure standard.

Connecting Nintendo DS to WiFi | AT&T Community Forums  
The 3DS provides "Nintendo DS" connections for WiFi in the settings to be compatible with original DS games. The problem is, since the original DS only supports WEP, the settings in the 3DS only allow connection to WEP networks when the 3DS itself can connect to WPA2 just fine in it's normal WiFi settings.
