Donald Norman might differ. Living with Complexity takes the theses offered in his earlier books The Design of Everyday Things and Emotional Design and extrapolates them from the world of goods into the world of service providers. In Norman's view, Gore's desk is the cluttered extension of an organized mind.*

We can't be sure that our review influenced his newest book Living with Complexity, but since Norman's work centered on frustrating objects, the extrapolation into systems was bound to happen. Kolko's new book Exposing the Magic of Design might seem superficially similar to Norman's to those of us in the industrial design field, but Kolko has profoundly different content.*
