Variables

Independent and
Dependent Variable

Examples

The independent and dependent variables are the two key variables in a science experiment.

The independent variable is the one the experimenter controls.

The dependent variable is the variable that changes in response to the independent

Variables

independent variable

Dependent Variable: a

variable whose value

depends on the

independent variable . It

is the "effect" variable.

It is ALWAYS graphed

on the y axis. It is

ALWAYS listed second

in an x,y table. It is the

responding variable.
