Anna Haensch - Math 311: Number Theory

Question from Number Theory Through Inquiry. Let  $p$  be a prime,  $n$  a nonzero integer, and  $k$  a natural number. Then the number of  $k$ -th roots of  $n$  modulo  $p$  is either  $0$  or  $k$ . Thoughts: I see that the question can be simplified to restricting to  $n$  being a divisor of  $p-1$ , but I haven't been able to make further progress.

through the Theory of Numbers. Some Typical Number Theoretic Questions The main goal of number theory is to discover interesting and unexpected relationships between different sorts of numbers and to prove that these relationships are true. In this section we will describe a few typical number theoretic problems, some of which we will eventually solve, some of which have known solutions too
